

Hurricane Irma 2017

By Janet Romo

Hurricane Irma was a very big storm! It hit Florida on September 10th and 11th.

Hurricane Irma started in the Atlantic Ocean.

Hurricane Irma started when the Atlantic Ocean was warm and the air was cold.

Hurricanes have strong winds that move in a circle.

The middle of the wind circle is the eye of the storm.

Hurricane Irma hit the Caribbean islands and Florida.

The wind and rain from the hurricane caused a lot of damage.

Hurricane Irma blew down trees and electrical wires.

Hurricane Irma blew down parts of houses.

Hurricane Irma damaged cars.

Hurricane Irma caused floods.

Hurricane Irma is over now. Workers are fixing the electricity.

People are cleaning up Irma's mess.
