Many of the Pilgrims got pneumonia their first winter in Plymouth, MA. Many of the Pilgrims died from pneumonia.

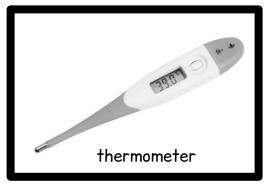

Pneumonia is an infection in a person's <u>lungs</u>. Sometimes it is caused by the flu.

Pneumonia has several symptoms. Symptoms are what happens to a person who is sick or hurt.

One of the symptoms is having a <u>fever</u>. A thermometer is used to find out how hot your body is.

Another symptom is a loss of appetite. That is when you do not want to eat food. Eating sounds AWFUL!

Another symptom is coughing. Sometimes **coughing** hurts your chest. Ouch!!!

A person who has pneumonia needs to stay in bed and **rest**.

You can prevent pneumonia by washing hands. Dirty hands spread germs. Germs make people sick.

When you go to the **bathroom** always wash your hands. You do not want to spread <u>germs</u>.

When you blow your nose, you need to wash your hands. You do not want spread <u>germs</u>.

Doctors help <u>patients</u> who have pneumonia. They listen to the <u>patient's</u> <u>lungs</u> using a **stethoscope**.

11

Doctors give **medicine** to <u>patients</u> with pneumonia. The <u>patient</u> can recover.

A long time ago there was **no medicine** for pneumonia. Many people died. Today people can recover.
