Chile- A blue whale was found on February 22nd.

The blue whale carcass was on a beach in Chile. Chile is a country in South America.

Blue whales are the largest mammal. A blue whale is bigger than an elephant.

There are not enough blue whales. Someday there may not be any. Blue whales are endangered.

The scientists think red algae killed the whale. It is poisonous.

Tourists sat on the carcass.
They took pictures.

The tourists carved their
names on the blue whale.

Rodrigo lives in Chile. He was mad. He posted pictures of the tourists on Twitter. Why do you think Rodrigo was mad?
