Birds use their **beaks** for many things. A bird's beak is its mouth. What other animals have a mouth?

There are different **sizes** of beaks. Some birds have a small beak. Some birds have a big beak.

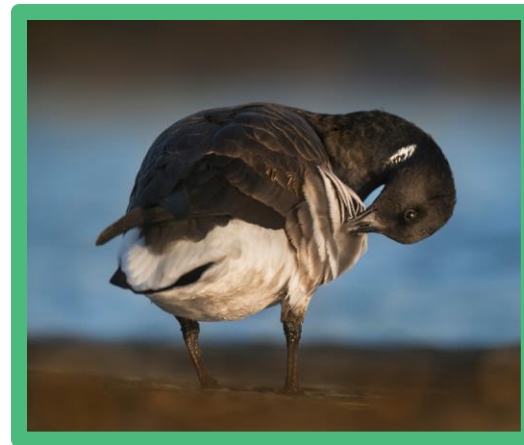

Birds **eat** with their beaks. Birds with small beaks eat small things. This bird has a small beak. This bird eats small berries.

Birds **hunt** with their beaks. Birds with big beaks eat big things. This bird caught a fish to eat.

Birds **fight** with their beaks. Sometimes they bite other birds. Do other animals fight? Why?

Birds **preen** with their beaks. Cleaning feathers is called preening. How do other animals clean themselves?

Birds use their beaks to **carry** things. What do birds need to carry? How do other animals carry things?

Birds use their beaks to make a **nest**. They move twigs and grass. What other animals make a nest?

Birds use their beaks to **feed** their babies. What do baby birds eat?
