A cockroach is an insect.
Cockroaches live all over the
world.

Katie Holley lives in Florida.
There were a few
cockroaches in her house.

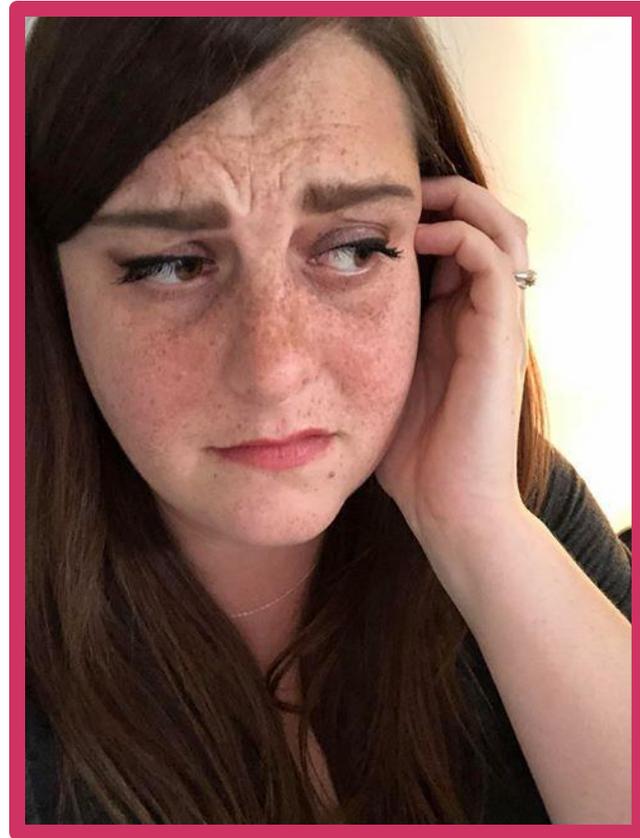

On April 14th Katie was sleeping. She felt something crawl in her ear. It was a cockroach! It hurt.

Katie's husband tried to get it out. He could not. He drove Katie to the hospital.

The doctor tried to get the cockroach out. He got part of the cockroach out.

Katie went home. Her ear still hurt.

Katie went to a new doctor.
The new doctor got the rest of
the cockroach out of her ear.

Katie was so happy. Her ear
did not hurt anymore.

Katie sleeps with earplugs now.
She does not want another
cockroach to crawl in her ear!
