A cougar is a wild cat. A cougar is also called a mountain lion.

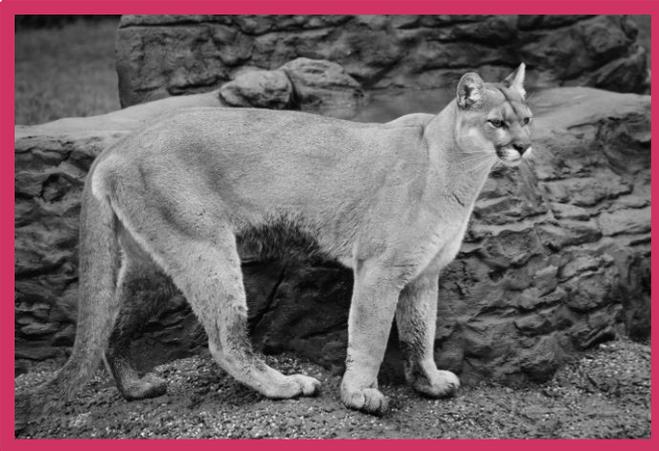

Some cougars live in the state of Washington.

On May 21st, two men were riding mountain bikes. They were in the forest in Washington.

The men saw a cougar. They yelled. They made noise. Usually that scares cougars away.

The cougar did not get scared.
Usually cougars stay away
from people.

Cougars run fast. The cougar
chased the men.

The cougar attacked one of the men.

The other man ran away. The cougar ran after him. It killed him.

Scientists do not know why the cougar killed the man. Maybe the cougar was sick. Maybe the cougar was very hungry.
