Hawaiian Islands

Hawaii

Hawaii is in the Pacific Ocean.
Hawaii has 8 islands. One
island is the Big Island.

A volcano erupted on the Big
Island on May 3rd.

Lava came out of the ground.
It shot up into the air.

The volcano made the air
smell bad. It smelled like rotten
eggs. It is dangerous to
breathe.

Lava flowed into houses and into roads.

It was not safe. People had to leave their homes.

9 homes burned down from the volcano.

Some schools were closed because of the volcano.

The lava will get hard. It will turn into rock.
