## Volcano Erupts in Hawaii

**Hawaii**-Hawaii is in the Pacific Ocean. Hawaii has 8 islands. One island is called the Big Island.

A volcano erupted on the Big Island on May 3<sup>rd</sup>.

Lava came out of the ground. It shot up into the air.

The volcano made the air smell bad. It smelled like rotten eggs. It is dangerous to breathe.

Lave flowed into houses and into roads.

It was not safe. People had to leave their homes.

9 homes burned down from the volcano.

Some schools were closed because of the volcano.

The lava will get hard. It will turn into rock.
