There are many types of **bats**.
 There are more than 1,000!
 What do you know about bats?

Baby bat drinking milk from mother

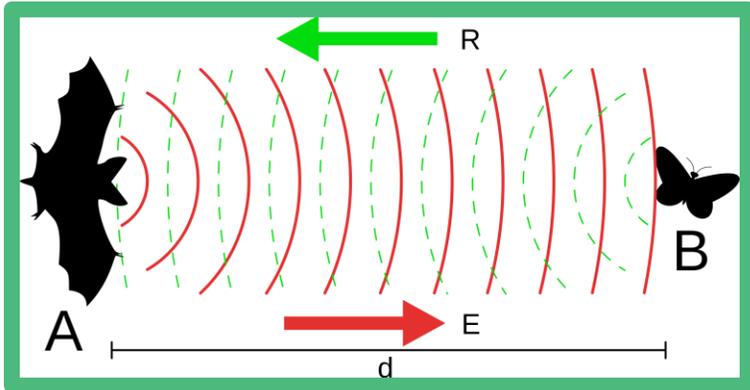

All bats are **flying mammals**.
 Mammals feed their babies
 milk. What other animals are
 mammals?

All bats are awake at night. Bats are **nocturnal**. What do you do at night?

Microbats eat **insects**. They can eat 1,000 insects in one hour! What insects do you see outside?

Microbats cannot see in the dark. They make sounds. They listen to it **echo**. That is how they find insects. How do you find things?

Bats fly home in the morning. They sleep in the **day**. What do you do during the day?

Microbats sleep in **caves**.
They sleep upside down.
What is a cave?

Microbats also sleep
under **bridges**. Are there
bridges where you live?

At night, the bats **wake up**. They stay up all night. They look for insects to eat.
