## Crows Trained to Clean

**France-** There is a medieval theme park in France.

There are shows at the theme park. Trained birds are in some of the shows.

A bird trainer works at the theme park. His job is to train birds for the shows.

Tourists like to see the birds perform.

Some tourists at the theme park smoke cigarettes.

Sometimes tourists put the cigarette butts on the ground. That is littering.

The bird trainer had an idea. He trained 6 crows to put the butts in the garbage.

The crows started to work on August 13, 2018.

People need to use the garbage can. Crows should not have to clean the park.
