## Photos of Fossils

**California**-Fossils are rocks with plants or animals in them.

Charles Marshall studies fossils. He is a paleontologist from California.

Many fossils are in museums. People can see them.

The museums also have a lot of fossils in boxes. People cannot see those fossils.

There is an important museum in Brazil. Many boxes were in that museum.

On September 2<sup>nd</sup>, there was a fire at that museum. Many boxes were burned.

Charles Marshall is worried about boxes in other museums. What happens if there is a fire?

Marshall has an idea. He wants museums to take pictures of everything in boxes.

The museums will take pictures. Marshall is happy!
