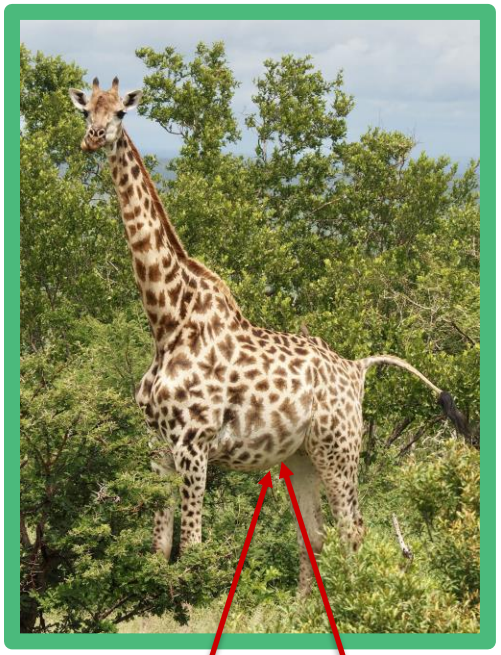
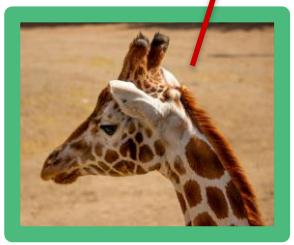
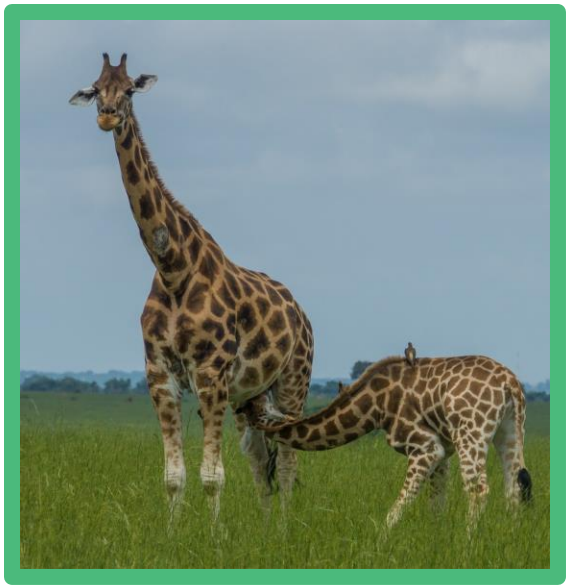
Is a **giraffe** a mammal?
Let's see.



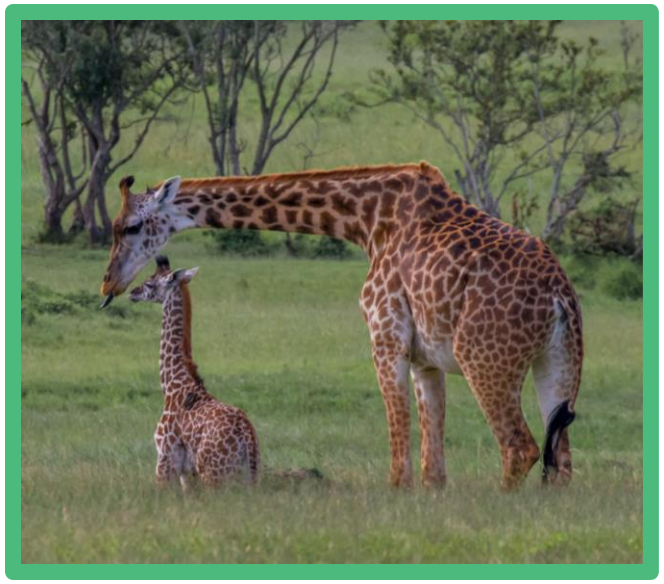


Baby giraffes grow in their mother's **womb**.

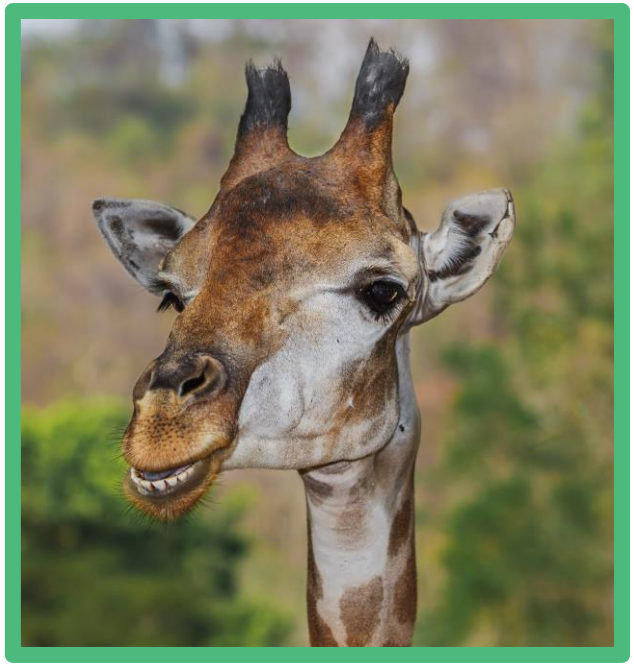
Giraffes are **born live.**
They do not hatch
from eggs.

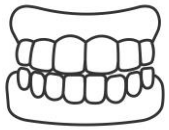


Baby giraffes drink **milk**
from their mother.



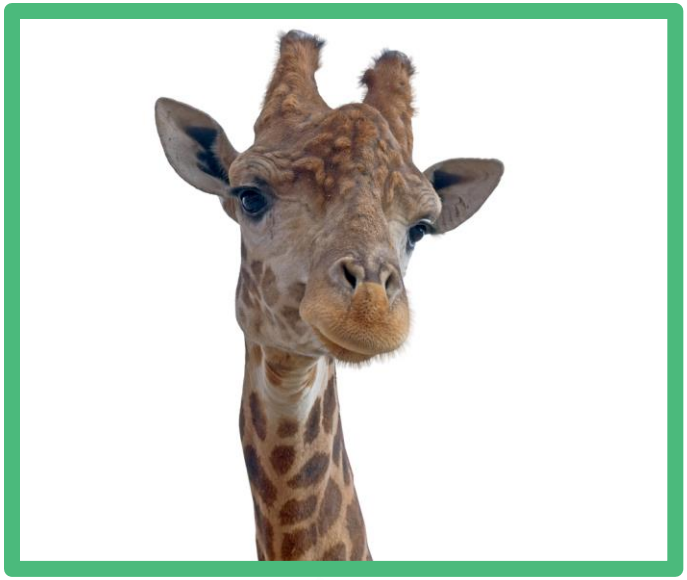
Baby giraffes **need help**.
They can't live alone.
They need their mother.

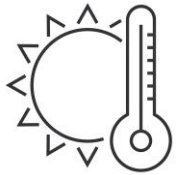




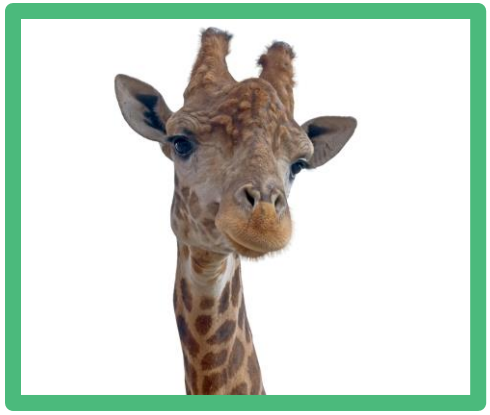
Giraffes have **teeth**.
They use them to eat.

Giraffes have **hair**.
It is their fur.





Giraffes are **warm blooded**. The inside of a giraffe stays the same temperature all the time.



Is a giraffe a **mammal**? Yes!
You are a mammal too!
