Natural resources are all over Earth. They are not made by people.

People use natural resources. Wood is a natural resource.

Air is a natural resource.
We breathe air.

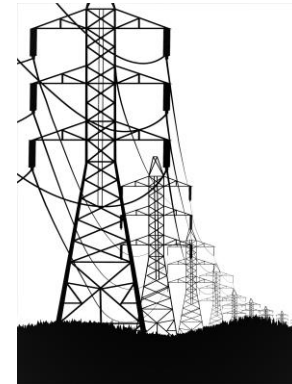

Water is a natural resource.
We drink water.

Soil is a natural resource.
Plants grow in soil.

Plants are a natural
resource. We eat plants.

Animals are a natural resource.
Some people eat meat.

Rocks are a natural resource.
Coal is a rock. It is used to
make electricity.

People, animals, and plants all
need natural resources.
